Conduit Installation in Frames

We're wired to meet your conduit needs

Exclusively available at the Republic Regional Service Center in Atlanta, frames & elevations can now be ordered with preinstalled conduit.

Our team of service center experts will install conduit to your specifications and ship direct to jobsite, ready for installation.

Configuration Components

Conduit Run

- Conduit & straight junction box connector
- Connecting conduit to junction box

Elbow Run

- Conduit & 90° elbow connector
- For 90° changes in direction

T Run

- Conduit & T connector
- Combines two separate runs

Any of the above options can be used alone or in combination to meet most any configuration you need

Features

- ¾" EMT (Electrical Metallic Tubing)
- To be used for low voltage applications (12 and 24 volts) hardware
- Offered on both welded and KD frames and elevations

Certifications

- UL Fire Label available
 - Confirm with local AHJ for final approval

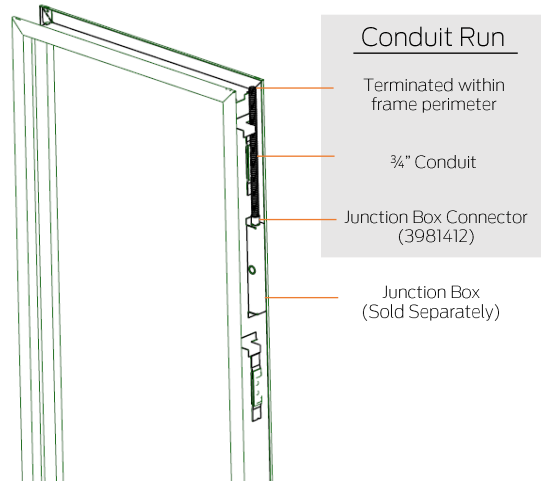

Ordering

- Conduit layout drawings should be provided with order
- Order to be placed with Atlanta Republic Service Center

Offering & Pricing

Conduit Request	Description	List Price
Conduit Run	Conduit & Junction Box Connector	\$148
Elbow Run	Conduit & 90° Elbow Connector	\$178
T Run	Conduit & "T" Connector	\$216
Multi-Conduit Prep	Drilled prep to pass conduit through mullion	\$31

Republic Part #	Description	List Price
3981412	Junction box connector (3/4" EMT)	\$18
3981414	Elbow connector (3/4" EMT)	\$40
3981413	T connector (3/4" EMT)	\$59
3981416	3/4" Conduit (EMT) - 10' stick	\$63

Ordering

- Conduit layout drawings should be provided with request/order.
- Conduit, Elbow, and "T" Runs priced for up to 5' lengths.
- Junction boxes are required (some exceptions with elevations) and sold separately with hardware preparations.
- Hardware preparations are not included, pricing found on Service Center Modification Menu.
- Elevations should be welded at time of conduit install to ensure properly prepared for conduit prior to welding.
- Long runs may be tack welded to frame (and sprayed with primer) for stability in shipping
- All conduit runs will be (unless otherwise specified)
 - Directed to the ceiling
 - Terminated inside the Frame profile (not extended beyond Frame perimeter) to reduce risk of damage in shipping.
 - Conduit will terminate approximately 3/4" beyond rabbet in head.
- Anchor Limits – Not compatible with Masonry T anchors
- Place orders via Atlanta Regional Service Center
 - Republic.Atlanta@allegion.com
- Customer regional center discount applies or valid product quote.
